<b>Abstract</b>	<b>iii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Inhomogeneity in strongly-correlated electron systems . . . . .	1
1.2 Purpose of this thesis . . . . .	3
1.3 Structure of this thesis . . . . .	3
<b>2 Experiments on electronic inhomogeneity</b>	<b>4</b>
2.1 Phase diagrams of perovskite manganites . . . . .	4
2.1.1 $\text{La}_{1-x}\text{Sr}_x\text{MnO}_3$ : large bandwidth case . . . . .	5
2.1.2 $\text{La}_{1-x}\text{Ca}_x\text{MnO}_3$ : intermediate bandwidth case . . . . .	7
2.1.3 $\text{Pr}_{1-x}\text{Ca}_x\text{MnO}_3$ : narrow bandwidth case . . . . .	9
2.1.4 Schematic phase diagram as a function of bandwidth . . . . .	9
2.2 Inhomogeneity in perovskite manganites . . . . .	11
2.3 Quenched disorder and inhomogeneity . . . . .	15
2.3.1 A-site randomness and nanometer scale inhomogeneity . . . . .	15
2.3.2 B-site randomness and sub-micrometer scale inhomogeneity . . . . .	20
2.4 Inhomogeneity observed in other strongly correlated electron systems . . . . .	22
2.5 Where inhomogeneity plays important role - CMR and CER - . . . . .	22
2.5.1 CMR and inhomogeneity . . . . .	22
2.5.2 CER and inhomogeneity . . . . .	26
<b>3 Theoretical works on electronic inhomogeneity</b>	<b>31</b>
3.1 Model for CMR manganites . . . . .	31
3.2 Phase separation and electronic inhomogeneity . . . . .	34
3.2.1 One-orbital model . . . . .	34
3.2.2 Two-orbital model . . . . .	35
3.2.3 Effect of Coulomb interactions . . . . .	37
3.2.4 Effect of quenched disorder . . . . .	39
3.3 A simplified two-fluid model ( <i>lb</i> model) . . . . .	40

3.4	Electronic inhomogeneity in the $\ell b$ model . . . . .	41
<b>4</b>	<b>Model and Method</b>	<b>45</b>
4.1	Model . . . . .	45
4.2	Method . . . . .	46
4.2.1	Hartree approximation . . . . .	46
4.2.2	Monte Carlo simulation . . . . .	46
4.2.3	Polynomial expansion Monte Carlo method (PEMC) .	47
4.2.4	Truncated polynomial expansion Monte Carlo method (TPEMC) . . . . .	49
<b>5</b>	<b>Results</b>	<b>51</b>
5.1	Hartree approximation . . . . .	51
5.1.1	Phase separation and phase diagram . . . . .	52
5.1.2	Effect of surface . . . . .	56
5.2	Monte Carlo simulation . . . . .	62
5.2.1	Phase separation and phase diagram . . . . .	62
5.2.2	Effect of surface . . . . .	68
5.2.3	Effect of impurity . . . . .	71
5.3	Application of truncated polynomial expansion method . . .	72
5.3.1	Comparison with conventional Monte Carlo method .	76
5.3.2	Effect of impurity . . . . .	79
5.3.3	Effect of surface on electronic inhomogeneity . . . . .	79
5.3.4	Discussion . . . . .	83
<b>6</b>	<b>Summary</b>	<b>84</b>
